Databases: SQL

Projects

Weather App | [Click](#)

- Developed a responsive web application that provides real-time weather updates based on user input (city name).
- Integrated the OpenWeatherMap API to fetch current weather data including temperature, humidity, wind speed, and weather conditions.
- Implemented error handling for invalid city inputs and network issues.

Portfolio Website | [Click](#)

A fully responsive and modern personal portfolio website built using HTML, CSS, JavaScript, and modern frameworks. It features smooth navigation, section-based scrolling, and a clean UI to showcase my skills, projects, contact details. Designed to provide an engaging user experience and optimized for both desktop and mobile devices.

Tic Tac Toe Game | [Click](#)

A fun, interactive, and fully responsive game built using HTML, CSS, and JavaScript. It features a clean UI, real-time player turn updates, automatic win/draw detection, and a reset option. Designed for smooth gameplay and optimized for both desktop and mobile devices.

Experiences

Deloitte Australia Technology Job Simulation on Forage - July 2025

- Completed a job simulation involving development and coding
- Wrote a proposal for creating a dashboard
